

Intrigue™ REAR PROJECTION SCREEN

CLEAR HOLOGRAPHIC

The Intrigue rear projection screen is a transparent rear projection screen which has no specific projection angle required to hold bright, clear and vibrant images from standard projectors

This is a rigid 3mm thick screen so it can be hung frameless for that floating image look or it can be hung with frames or built into projection systems easily.

This rigid rear projection screen is made with no external layers, films or coatings and is durable and water proof making it the best choice when looking for a clear/transparent projection screen choice

This rear projection screen comes in sizes up to 80"x120" and can be tiled to make larger displays
